Dear Mr. Udenenwu:

NRG Texas Power LLC ("NRG Texas") plans to comply with the discharge of bottom ash transport and Flue Gas Desulfurization (FGD) water to surface waters of the state in accordance with USEPA's Final Steam Electric Reconsideration Rule (ELG Rule), effective December 14, 2020, at the W.A. Parish Electric Generating Station (Parish) located in Fort Bend County, Texas. The ELG rule provides multiple compliance pathways listed in 40 CFR 423.13, including an ELG-compliant bottom ash system with up to 10% purge (§423.13(k)(2)(i)) and FGD water effluent limits (§423.13(g)(1)), permanent cessation of coal burning activities due to retirement or repowering (§423.13(k)(2)(ii), (g)(2)(i)), or low utilization electric generating units (§423.13(k)(2)(iii), (g)(2)(iii)).

NRG Texas is working diligently on an ELG Rule compliance path for Parish. NRG Texas will continue to provide annual updates on its compliance path, and if that path changes to cessation of coal combustion, will include updates on the related schedule and milestones in its annual update. In addition, NRG Texas would file for any necessary changes to its permit to reflect this compliance path.

If you have any questions, do not hesitate to contact me at (713) 537-2776 or by email at craig.eckberg@nrg.com.

Sincerely,

A handwritten signature in blue ink that reads "C.R. Eckberg". The signature is written in a cursive style with a long horizontal flourish at the end.

Craig Eckberg
Sr. Director, Environmental Services
NRG Energy, Inc.
