**Re: Midwest Generation, LLC – Will County Station
Account No. W1978100011
CCR Surface Impoundment Annual Consolidated Report**

In accordance with the requirements of Title 35 of the Illinois Administrative Code (“35 IAC”) Section 845.550, the Annual Consolidated Report is attached for the following CCR surface impoundments at Will County Generating Station:

Pond ID	CCR Surface Impoundment Description
W1978100011-01	Pond 1N
W1978100011-02	Pond 1S
W1978100011-03	Pond 2S
W1978100011-04	Pond 3S

The certification pages from the Hazard Potential Classification Assessments, Structural Stability Assessments, Safety Factor Assessments, and Inflow Design Flood Control System Plans have been provided in Attachment B. A full copy of these assessments can be found on our public website at www.midwestgenerationllc.com. If you have any questions or require additional information regarding this submittal, please contact Jill Buckley at Jill.Buckley@nrg.com.

Annual CCR Fugitive Dust Control Report

Will County Generating Station

529 East 135th Street/Romeoville, Illinois

1.0 *Introduction*

On April 15, 2021, the Illinois Pollution Control Board adopted a new part of its waste disposal regulations creating state-wide standards for the disposal of coal combustion residuals (CCR) in surface impoundments, created by the generation of electricity by coal-fired power plants (the IL CCR Rule). These requirements include air criteria specified in Title 35 of the Illinois Administrative Code, §845.500, to address the potential pollution caused by windblown dust from CCR units.

The Will County Generating Station, operated by Midwest Generation, LLC (MWG), is located at 529 East 135th Street, Romeoville, Will County, Illinois. The facility is a retired coal-fired electric power generating station that occupies approximately 200 acres. The last remaining coal-fired unit at the Station, Unit 4, ceased operation in June 2022. Electrical power was transmitted from the site to the area grid through overhead transmission power lines. The Rule applies to this facility due to the disposal management of CCR that is generated from the combustion of coal. CCR units associated with the station include the Pond 1 North (1N), Pond 2 South (1S), South Ash Pond 2 and South Ash Pond 3.

According to the IL CCR Rule, owners or operators of CCR units must adopt measures that will effectively minimize CCR from becoming airborne at the facility by developing and operating in accordance with a Fugitive Dust Control Plan (Plan) with adequate dust control measures. In this regard, a Plan was prepared that complies with the requirements as specified in §845.500(b)(1-7) of the Rule and placed in the Will County facility's operating record on October 31, 2021 per §845.800(d)(7). As required, the Plan was also posted to the publicly accessible internet site per §845.810(e).

In addition to the above and per §845.500(c), an Annual Fugitive Dust Control Report (Annual Report) must be completed that includes the following:

- Description of actions taken to control CCR fugitive dust and
- The four quarterly fugitive dust complaint reports submitted under subsection (b)(2)(B)

The Annual Report must be submitted as part of the annual consolidated report required by §845.550. This document represents the 2024 Annual Report for Will County and will also be appropriately placed in the facility's operating record per §845.800(d)(7) and posted to the publicly accessible internet site per §845.810(e).

Annual CCR Fugitive Dust Control Report

Will County Generating Station

529 East 135th Street/Romeoville, Illinois

2.0 Actions Taken to Control CCR Fugitive Dust

As detailed in the Plan and reiterated below, the station has established procedures and inspection requirements which are implemented to minimize/eliminate airborne emissions from the potential fugitive dust sources. The results from inspections conducted and associated observations made during CCR handling activities are documented on logs maintained in the station's Environmental Department.

2.1 South Ash Pond 2 and South Ash Pond 3

The Ash Ponds contain ash, all of which is below grade, which minimizes any potential fugitive dust emissions. Infrequently, when the ponds need to be dewatered and the sediment removed off site to a licensed landfill, there is the potential for this material to become airborne especially during excessively dry and windy conditions. Loading of this material under these conditions also has the potential for generating fugitive dust. Dewatered ponds are assessed on a quarterly basis or more frequently during excessively dry and windy conditions. To minimize fugitive dust emissions from exposed dry bottom ash and slag, the height of the staged material is minimized and the material piles are either sprayed with water or covered. Loading activities also are limited during such occasions. Haul trucks are covered with tarps once they have been loaded.

There were no ash removal activities from the Ash Ponds conducted during this reporting period.

2.2 Ash Pond 1N and Ash Pond 1S

Ash Pond 1N and Ash Pond 1S are inactive surface impoundments and no longer receive bottom ash or slag. The bottom ash/slag material remains within each pond. Precipitation that falls on the bottom ash/slag prevents it from drying out and becoming airborne. Standing water is not present and excessive precipitation that enters each pond will drain out of the pond into the outlet trough. The bottom ash/slag is substantially vegetated with minimal amounts of ash exposed. Some ash does have the potential to become airborne especially during excessively dry and windy conditions. Each pond will be assessed at least quarterly or more frequent during excessively dry and windy conditions. To minimize fugitive dust emissions from exposed dry bottom ash and slag, the material will be sprayed with water, as needed.

Annual CCR Fugitive Dust Control Report

Will County Generating Station

529 East 135th Street/Romeoville, Illinois

2.3 Concrete Storage Pad

The concrete pad only periodically contains bottom ash and slag, fly ash and other ash-related materials generated from routine maintenance activities. Typically, these materials are in a wet state but are allowed to partially dry to facilitate removal. When sufficiently dry, the material is promptly removed to an off-site licensed landfill. The concrete pad is assessed on a quarterly basis or more frequently during excessively dry and windy conditions. To minimize fugitive dust emissions from exposed dry bottom ash and slag, fly ash, and other ash related materials, the height of the staged material is minimized, and the material piles are either sprayed with water or covered.

2.4 Ash Transport Roadways

During CCR hauling activities, truck drivers are instructed on the proper procedure for cleaning trucks and a vehicle speed limit is enforced at the facility. Ash material that may not have been adequately removed from the trucks has the potential to become airborne and ultimately be deposited on haul roads. To minimize fugitive dust emissions, these roads are assessed on a quarterly basis and any observed accumulated ash material is promptly cleaned up and collected for off-site removal to a licensed landfill.

3.0 Fugitive CCR Dust Assessments

Pursuant to §845.500(b)(3), assessments of the potential fugitive dust emission sources identified in the Will County facility's CCR Fugitive Dust Control Plan (Plan) were conducted to assess the effectiveness of the Plan. The assessment includes observation of ash removal from ponds, temporary storage and transport activities at the facility to confirm the adequacy of the control measures. The assessments are conducted on a quarterly basis by an individual designated by the contact identified below. Observations made during each assessment are recorded on a form similar to the one included in Appendix B of the Will County facility's CCR Fugitive Dust Control Plan.

No issues were identified during this Annual Report's period of record covering January through December 2024.

Annual CCR Fugitive Dust Control Report

Will County Generating Station

529 East 135th Street/Romeoville, Illinois

Owner Representative/Responsible Person Contact Information:

Mr. Phillip Raush
Plant Manager
815-207-5412

4.0 Record of Citizen Complaints

Per the Rule, the Annual Report must include copies of the four quarterly fugitive dust complaint reports submitted under §845.500(b)(2)(B). The quarterly fugitive dust complaint reports contain a record of all citizen complaints that were received by the Will County station with regard to fugitive dust emission incidents. In line with established protocols and within 24 hours of receipt, the station's environmental coordinator enters the citizen complaint into MWG's Environmental Management Information System (EMIS) database. The EMIS database then automatically forwards notice of the complaint to the station manager and MWG's corporate environmental department. Following initial evaluation of the complaint, MWG then conducts a thorough investigation to confirm the reported incident/conditions and implement corrective actions as may be warranted.

No complaints were registered during this Annual Report's period of record covering January through December 2024.

5.0 Summary of Corrective Actions Taken

For the January through December 2024 period of record, and based on continued monitoring and inspections as outlined in Section 2.0 and 3.0 and as required under the CCR rules, the currently established control measures remain effective in minimizing potential fugitive dust emissions. Moreover, this assertion is further validated by the lack of citizen complaints logged over this same period. Accordingly, no corrective actions were undertaken during the past year.

Dear Sir or Madam:

In accordance with the requirements of Title 35 of the Illinois Administrative Code ("35 IAC") Section 845.500(b)(2)(B), this letter serves as the fugitive dust complaint report for First Quarter 2024 at Will County Generating Station. There were no complaints received from members of the public during the period January 1, 2024 through March 31, 2024.

If you have any questions or require additional information regarding this submittal, please contact Jill Buckley at Jill.Buckley@nrg.com.

Sincerely,

A handwritten signature in black ink, appearing to read "P. Raush".

ATTACHMENT B
2024 ANNUAL INSPECTION REPORT

ANNUAL INSPECTION REPORT
ASH PONDS 1N AND 1S
WILL COUNTY STATION
SEPTEMBER 2024

This annual inspection report has been prepared pursuant to the coal combustion residuals (CCR) rule codified in Title 35 of the Illinois Administrative Code, Section 845.540(b) for Ash Ponds 1N and 1S at Will County Station in Romeoville, Illinois (Station). The purpose of this project is to perform the annual inspection of Ash Ponds 1N and 1S by a licensed professional engineer to ensure that the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering standards. Civil & Environmental Consultants, Inc. (CEC) completed the following scope of services in preparing this annual inspection report:

- CEC reviewed the weekly inspection reports completed by a qualified person employed by Midwest Generation, LLC.
- CEC performed the annual inspection in accordance with the requirements of Part 845.540 including observations pertaining to the following:
 - Changes in Geometry: Observations of changes in the geometry of Ash Ponds 1N and 1S.
 - Instrumentation: Inspection of the location and type of existing instrumentation and documentation of the maximum recorded readings of each instrument from records provided by Station personnel.
 - Capacity and Impounded Volume: Approximate minimum, maximum, and present depth and elevation of the impounded water and CCR; storage capacity of the impounding structure at the time of the inspection; and the approximate volume of the impounded water and CCR at the time of the inspection.
 - Structural/Operational Observations: Inspection for actual or potential structural weakness of the CCR surface impoundment, in addition to any existing conditions that are disrupting or have the potential to disrupt the operation and safety of the CCR surface impoundment and appurtenant structures;
 - Other Changes: Inspection including change(s) which may have affected the stability or operation of the impounding structure.

Ash Ponds 1N and 1S are inactive surface impoundments, both less than 2 acres in size. Will County Station ceased operations on June 11, 2022. On September 4, 2024, CEC inspected Ash Ponds 1N and 1S and our observations showed no signs of distress that would suggest the stability or operation of the impounding structures are compromised.

1.0 CHANGES IN GEOMETRY

At the time of inspection, Ash Ponds 1N and 1S geometry was observed to be unchanged from previous inspection.

2.0 INSTRUMENTATION

Based on our interview of Station personnel, which was confirmed through our inspection, Ash Ponds 1N and 1S have no instrumentation.

3.0 CAPACITY AND IMPOUNDED VOLUME

Capacity and impounded volume of Ash Ponds 1N and 1S and estimated depth of impounded water and CCR are represented in Table 1 and 2, attached. Volumes and depths were determined through discussion with station personnel and by reviewing inspection reports, construction drawings, and from modeling using existing topographic data.

4.0 STRUCTURAL/OPERATIONAL OBSERVATIONS

Ash Ponds 1N and 1S were inspected for signs of distress that would have the potential to disrupt operation and safety of the basin. Prior to performing the initial inspection, discussions with station personnel did not identify conditions that indicate an actual or potential structural weakness. Weekly and monthly inspection reports were also reviewed and did not indicate an actual or potential structural weakness.

5.0 OTHER CHANGES

Ash Ponds 1N and 1S were inspected for signs of other changes or distress that would have the potential to disrupt operation and safety of each basin. Our inspection showed no distresses that would affect the operation and/or stability of Ash Ponds 1N and 1S.

6.0 LIMITATIONS AND CERTIFICATION

This annual CCR annual inspection report was prepared to meet the requirements of Section 845.540(b) and was prepared under the direction of Mr. M. Dean Jones, P.E.

By affixing my seal to this, I do hereby certify to the best of my knowledge, information, and belief that the information contained in this report is true and correct. I further certify I am licensed to practice in the State of Illinois and that it is within my professional expertise to verify the correctness of the information. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment.

ANNUAL INSPECTION REPORT
ASH PONDS 2S AND 3S
WILL COUNTY STATION
SEPTEMBER 2024

This annual inspection report has been prepared pursuant to both Title 35 of the Illinois Administrative Code (35 IAC) Part 845, Subpart E, Section 845.540(b) for Ash Ponds 2S and 3S at Will County Station in Romeoville, Illinois (Station). The purpose of this project is to perform the annual inspection of Ash Ponds 2S and 3S by a licensed professional engineer to ensure that the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering standards. Civil & Environmental Consultants, Inc. (CEC) completed the following scope of services in preparing this annual inspection report:

- CEC reviewed the weekly inspection reports completed by a qualified person employed by Midwest Generation, LLC.
- CEC performed the annual inspection in accordance with the requirements of 35 IAC Part 845.540 including observations pertaining to the following:
 - Changes in Geometry: Observations of changes in the geometry of Ash Ponds 2S and 3S.
 - Instrumentation: Inspection of the location and type of existing instrumentation and documentation of the maximum recorded readings of each instrument from records provided by Station personnel.
 - Capacity and Impounded Volume: Approximate minimum, maximum, and present depth and elevation of the impounded water and CCR; storage capacity of the impounding structure at the time of the inspection; and the approximate volume of the impounded water and CCR at the time of the inspection.
 - Structural/Operational Observations: Inspection for actual or potential structural weakness of the CCR surface impoundment, in addition to any existing conditions that are disrupting or have the potential to disrupt the operation and safety of the CCR surface impoundment and appurtenant structures;
 - Other Changes: Inspection including change(s) which may have affected the stability or operation of the impounding structure.

Ash Ponds 2S and 3S are surface impoundments, both less than 2 acres in size. Will County Station ceased operations on June 11, 2022. On September 4, 2024, CEC inspected Ash Ponds 2S and 3S and our observations showed no signs of distress that would suggest the stability or operation of the impounding structures are compromised. At the time of our inspection, both Pond 2S and 3S were inactive.

1.0 CHANGES IN GEOMETRY

At the time of inspection, Ash Ponds 2S and 3S geometry was observed to be unchanged from previous inspection.

2.0 INSTRUMENTATION

Based on our interview of Station personnel, which was confirmed through our on-site inspection, Ash Ponds 2S and 3S have water levels gauges.

3.0 CAPACITY AND IMPOUNDED VOLUME

Capacity and impounded volume of Ash Ponds 2S and 3S and estimated depth of impounded water and CCR are represented in Table 1 and 2, attached. Volumes and depths were determined through discussion with station personnel and by reviewing inspection reports, construction drawings, and from modeling using existing topographic data.

4.0 STRUCTURAL/OPERATIONAL OBSERVATIONS

Ash Ponds 2S and 3S were inspected for signs of distress that would have the potential to disrupt operation and safety of the basin. Prior to performing the initial inspection, discussions with station personnel did not identify conditions that indicate an actual or potential structural weakness. Weekly and monthly inspection reports were also reviewed and did not indicate an actual or potential structural weakness.

5.0 OTHER CHANGES

Ash Ponds 2S and 3S were inspected for signs of other changes or distress that would have the potential to disrupt operation and safety of each basin. Our inspection showed no distresses that would affect the operation and/or stability of Ash Ponds 2S and 3S.

6.0 LIMITATIONS AND CERTIFICATION

This annual CCR inspection report was prepared to meet the requirements of 35 IAC Section 845.540(b) and was prepared under the direction of Mr. M. Dean Jones, P.E.

By affixing my seal to this, I do hereby certify to the best of my knowledge, information, and belief that the information contained in this report is true and correct. ATTACHMENT B.1
2024 ANNUAL HAZARD POTENTIAL
CLASSIFICATION CERTIFICATION

ponds are of similar construction, size, and age. Each pond is constructed with a concrete weir spillway along the west half. Gravel access roads are located along the sides of the ponds.

Table 1: Ash Pond Construction

Pond ID	Year of Original Construction	Dimension (ft x ft)	Depth (ft)	Capacity (ft ³)	Status
Pond 1N	1977	167 x 333	7	520,000	Inactive
Pond 1S	1977	300 x 195	7	460,000	Inactive

4.0 HAZARD CLASSIFICATION ASSESSMENT

Our annual inspection showed no physical modifications to Ponds 1N and 1S or to the surrounding area and no distress that would affect the operation and/or stability. There have been no physical modifications or operational concerns that would change the results of the initial HPCA.

Based on the results of the annual inspection, review of the previous HPCA report, and the analysis provided in this report, Ponds 1N and 1S are classified as a Class 2 CCR impoundment because their failure would not result in probable loss of life but could result in impacts to the Des Plaines River creating potential economic loss, environmental damage, disruption of lifeline facilities, or impact other concerns.

5.0 LIMITATIONS AND CERTIFICATIONS

This Hazard Potential Classification Assessment Report has been prepared pursuant to the CCR rule codified in Title 35 of the Illinois Administrative Code, Section 845.440(a) and was prepared under the direction of Mr. M. Dean Jones, P.E.

By affixing my seal to this, I do hereby certify to the best of my knowledge, information, and belief that the information contained in this report is true and correct. ASSESSMENT CERTIFICATION

5.0 LIMITATIONS AND CERTIFICATION

This annual Structural Stability and Factor of Safety Assessment report was prepared to meet the requirements of Sections 845.450 and 845.460 of the Illinois Administrative Code draft Title 35 Subtitle G Subchapter I Subchapter j Coal Combustion Waste Surface Impoundments, and was prepared under the direction of Mr. M. Dean Jones, P.E.

By affixing my seal to this, I do hereby certify to the best of my knowledge, information, and belief that the information contained in this report is true and correct. I further certify I am licensed to practice in the State of Illinois and that it is within my professional expertise to verify the correctness of the information. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment.

Illinois Professional Engineer No.: 062-051317

Expiration Date: November 30, 2025

ATTACHMENT B.4
2024 ANNUAL INFLOW DESIGN FLOOD
CONTROL SYSTEM PLAN
CERTIFICATION

6.0 CONCLUSIONS

Based on the results in Table 5-1, Will County's Pond 1N and Pond 1S have adequate hydraulic capacities to retain the 1,000-year flood event without water overtopping the former ponds' dikes, even under the very conservative assumption that the hydraulic structures downstream of the former ponds are full at the time of the design storm event. Therefore, Ponds 1N and 1S are able to collect and control the inflow design flood event specified in 35 Ill. Adm. Code 845.510(a)(3).

7.0 CERTIFICATION

I certify that:

- This inflow design flood control system plan was prepared by me or under my direct supervision.
- The work was conducted in accordance with the requirements of 35 Ill. Adm. Code 845.510.
- I am a registered professional engineer under the laws of the State of Illinois.

Certified By: Thomas J. Dehlin Date: October 13, 2024

6.0 CONCLUSIONS

Based on the results in Table 5-1, Will County's South Ash Pond 2 and South Ash Pond 3 have adequate hydraulic capacities to retain the 1,000-year flood event without water overtopping the ponds' dikes. Therefore, South Ash Ponds 2 and 3 are able to collect and control the inflow design flood event specified in 35 Ill. Adm. Code 845.510(a)(3).

7.0 CERTIFICATION

I certify that:

- This inflow design flood control system plan was prepared by me or under my direct supervision.
- The work was conducted in accordance with the requirements of 35 Ill. Adm. Code 845.510.
- I am a registered professional engineer under the laws of the State of Illinois.

1.0 INTRODUCTION and OVERVIEW

Groundwater monitoring requirements in accordance with the Ill. Adm. Code Title 35, Part 845: Standards for the Disposal of Coal Combustion Residuals in Surface Impoundments dated April 15, 2021 (State CCR Rule), have been completed for the monitoring wells associated with Ash Ponds 1 North (1N) and 1 South (1S) located at the Midwest Generation, LLC (Midwest Generation) Will County Generating Station. The wells sampled were selected to meet the monitoring requirements of the State CCR Rule for the Ash Ponds 1N and 1S. The CCR monitoring well network around Pond 1N consists of five monitoring wells (MW-01, MW-02, MW-07, MW-14 and MW-15) with wells MW-01 and MW-02 being the upgradient monitoring points. The CCR monitoring network around Pond 1S consists also consists of five monitoring wells (MW-03, MW-04, MW-08, MW-09 and MW-13) with monitoring wells MW-03 and MW-04 being upgradient monitoring points. The well locations are shown on Figure 1.

All CCR groundwater monitoring data available to date are provided in Tables 1A and 1B for ponds 1N and 1S, respectively. The turbidity data is provided in Tables 2A and 2B for Ponds 1N and 1S, respectively. Since these two ponds were not regulated under the Federal CCR Rule, additional monitoring wells needed to be installed, and groundwater sampling for establishing statistical background needed to be completed to meet the new State CCR Rule requirements. A variance petition to extend the schedule for submittal of the Application for Initial Operating Permit (Application) for these ponds was filed and granted by the Illinois Pollution Control Board (IPCB). The Application was submitted on March 31, 2022.

This overview of the 2024 groundwater monitoring period is provided in accordance with Section 845.610(e)(4). Each required item is discussed separately below.

- Section 845.610(e)(4)(A and B) – *Proposed* statistical background concentration calculations (see Tables 3 and 4, for Ponds 1N and 1S, respectively) were submitted to the Agency as part of the Application for Initial Operating Permit. This Application is currently still under Agency review. However, assuming that the Agency accepts the proposed background calculations, for the 2024 reporting period, the following are constituents with potential statistically significant increases (SSIs) above the *proposed* background concentrations. It is noted that other than those constituents identified in the next main bullet, none of these potential SSI concentrations are above *proposed* site-specific GWPSs. The constituents and associated wells are:

Pond 1N

- Calcium: MW-01 (1st and 4th quarters), MW-07 (1st through 3rd quarters), MW-14 (1st and 2nd quarters), MW-15 (1 through 4th quarters)
- Chloride: MW-01, MW-07, MW-14 and MW-15 (1st through 4th quarters), MW-02 (1st through 3rd quarters)
- Fluoride: MW-01 (1st through 3rd quarters), MW-07 (4th quarter)
- pH: MW-01 (2nd quarter), MW-02 and MW-14 (1st through 4th quarter), MW-07 (3rd and 4th quarters), MW-15 (3rd quarter)

- Sulfate: MW-07 (3rd quarter), MW-14 (1st quarter), MW-15 (1st through 4th quarters)
- Total Dissolved Solids (TDS): MW-07 (1st quarter), MW-15 (1st, 2nd and 4th quarters)
- Arsenic: MW-02, MW-14, and MW-15 (1st through 4th quarters), MW-07 (1st, 3rd and 4th quarters)
- Barium: MW-07 and MW-14 (1st quarter), MW-15 (1st and 2nd quarters)
- Cobalt: MW-01 (3rd quarter), MW-15 (1st quarter)

Wells MW-01 and MW-02 are upgradient monitoring points.

Pond 1S

- Chloride: MW-08, MW-09, and MW-13 (1st through 4th quarters)
- Fluoride: MW-08 and MW-09 (1st through 4th quarters)
- pH: MW-08 (4th quarter), MW-09 (1st through 4th quarters), MW-13 (2nd and 3rd quarters)
- Barium: MW-13 (1st and 2nd quarters)
- Cobalt: MW-04 (4th quarter)
- Mercury: MW-09 (1st quarter)
- Molybdenum: MW-08 and MW-09 (3rd and 4th quarters)
- Selenium: MW-04 (1st quarter)

Wells MW-03 and MW-04 are upgradient monitoring points.

- Section 845.610(e)(4)(C and D) – Section 845.610(e)(4)(C and D) – *Proposed GWPSs* in accordance with Section 845.600(a)(2) (see Tables 3 and 4 for Ponds 1N and 1S, respectively) were submitted to the Agency as part of the Application for Initial Operating Permit. This Application is currently still under review by the Agency. However, assuming that the Agency accepts the *proposed GWPSs*, for the 2024 reporting period, the following constituents are above the *proposed GWPSs*:

Pond 1N

- Calcium: MW-01 (1st and 4th quarters), MW-07 (1st through 3rd quarters), MW-14 (1st and 2nd quarters), MW-15 (1 through 4th quarters)
- Sulfate: MW-07 (3rd quarter), MW-14 (1st quarter), MW-15 (1st through 4th quarters)
- Total Dissolved Solids (TDS): MW-07 (1st quarter), MW-15 (1st, 2nd and 4th quarters)
- Arsenic: MW-02 (1st, 3rd and 4th quarters)

Wells MW-01 and MW-02 are upgradient monitoring points.

Pond 1S

- pH: MW-09 (2nd and 4th quarters)

- Chloride: MW-08 (2nd quarter), MW-13 (1st and 2nd quarters)
- Wells MW-03 and MW-04 are upgradient monitoring points.
- Section 845.610(e)(4)(E through H) – Ponds 1N and 1S are currently not in corrective action.

2.0 ANNUAL STATUS SUMMARY

As discussed in Section 1.0, the CCR monitoring well network around Pond 1N consists of five monitoring wells (MW-01, MW-02, MW-07, MW-14 and MW-15) with wells MW-01 and MW-02 being the upgradient monitoring points. The CCR monitoring network around Pond 1S also consists of five monitoring wells (MW-03, MW-04, MW-08, MW-09 and MW-13) with monitoring wells MW-03 and MW-04 being upgradient monitoring points. The well locations are shown on Figure 1. All CCR groundwater monitoring data available to date are provided in Tables 1A and 1B for Ponds 1N and 1S, respectively. The turbidity data is provided in Tables 2A and 2B for Ponds 1N and 1S, respectively. The backup analytical packages have been previously provided as part of the 60-day submittal requirements.

This section provides the information specified under Section 845.610(e) (2-3).

2.1 Summary of Actions and Submittals (Section 845.610(e)(2))

The following key actions have been completed during the 2024 reporting period:

- Continued quarterly groundwater monitoring. The 60-day data summary submittals for all rounds collected have been placed in the facility's operating record in accordance with Section 845.610(b)(3)(D).
- Water levels were recorded monthly for the specified CCR monitoring wells and pond water levels were concurrently recorded.

Key activities for the upcoming year include:

- Receipt of an approved Application for Initial Operating permit which will facilitate finalization of the proposed statistical background concentrations and the proposed site-specific GWPSs. Once these are accepted/finalized by the Agency, formal groundwater data comparisons and evaluations can be made based on quarterly monitoring results relative to these comparison criteria.
- Receipt of an approved Application for Initial Construction Permit which will facilitate proceeding to formal closure of the regulated Units.

- Continued quarterly groundwater monitoring/reporting.

2.2 Groundwater Data Summary (Section 845.610(e)(3)(A-F)

Identification of monitoring wells and associated constituent concentrations above the *proposed* site-specific GWPSs was included in Section 1.0 above. A map showing these wells and constituent concentrations for the most recent round of groundwater sampling (4th quarter 2024) is provided on Figure 2.

There were no monitoring wells installed or decommissioned during this reporting period.

Water levels were recorded from the specified CCR monitoring wells and are summarized in Table 5. Potentiometric surface maps for each round of available water levels are provided in Attachment 1. Groundwater flow beneath Ash Ponds 1N and 1S is consistently in a westerly direction. In accordance with Section 845.640(c)(2), groundwater flow direction and seepage velocity estimates for each round of water levels are provided in Table 6.

A summary of the number of groundwater samples collected for analysis for each CCR monitoring well along with sample dates is provided in Table 7.

Proposed statistical background concentration calculations (see Tables 3 and 4) were submitted to the Agency as part of the Application for Initial Operating Permit. This Application is currently still under Agency review. However, assuming that the Agency accepts the *proposed* background calculations, the groundwater monitoring over the 2024 reporting period has identified the following constituents with potential statistically significant increases (SSIs) above the *proposed* background concentrations:

Pond 1N

- Calcium: MW-01 (1st and 4th quarters), MW-07 (1st through 3rd quarters), MW-14 (1st and 2nd quarters), MW-15 (1 through 4th quarters)
- Chloride: MW-01, MW-07, MW-14 and MW-15 (1st through 4th quarters), MW-02 (1st through 3rd quarters)
- Fluoride: MW-01 (1st through 3rd quarters), MW-07 (4th quarter)
- pH: MW-01 (2nd quarter), MW-02 and MW-14 (1st through 4th quarter), MW-07 (3rd and 4th quarters), MW-15 (3rd quarter)
- Sulfate: MW-07 (3rd quarter), MW-14 (1st quarter), MW-15 (1st through 4th quarters)
- Total Dissolved Solids (TDS): MW-07 (1st quarter), MW-15 (1st, 2nd and 4th quarters)
- Arsenic: MW-02, MW-14, and MW-15 (1st through 4th quarters), MW-07 (1st, 3rd and 4th quarters)
- Barium: MW-07 and MW-14 (1st quarter), MW-15 (1st and 2nd quarters)
- Cobalt: MW-01 (3rd quarter), MW-15 (1st quarter)

Wells MW-01 and MW-02 are upgradient monitoring points.

Pond 1S

- Chloride: MW-08, MW-09, and MW-13 (1st through 4th quarters)
- Fluoride: MW-08 and MW-09 (1st through 4th quarters)
- pH: MW-08 (4th quarter), MW-09 (1st through 4th quarters), MW-13 (2nd and 3rd quarters)
- Barium: MW-13 (1st and 2nd quarters)
- Cobalt: MW-04 (4th quarter)
- Mercury: MW-09 (1st quarter)
- Molybdenum: MW-08 and MW-09 (3rd and 4th quarters)
- Selenium: MW-04 (1st quarter)

Wells MW-03 and MW-04 are upgradient monitoring points.

As previously stated, other than those constituents identified in the second bullet in Section 1, none of these potential SSI concentrations are above *proposed* site-specific GWPSs.

1.0 INTRODUCTION and OVERVIEW

Groundwater monitoring requirements in accordance with the Ill. Adm. Code Title 35, Part 845: Standards for the Disposal of Coal Combustion Residuals in Surface Impoundments dated April 15, 2021 (State CCR Rule), have been completed for the monitoring wells associated with Ash Ponds 2 South (2S) and 3 South (3S) located at the Midwest Generation, LLC (Midwest Generation) Will County Generating Station. The wells sampled were selected to meet the monitoring requirements of the State CCR Rule for the Ash Ponds 2S and 3S. The CCR monitoring well network around these ponds consists of six monitoring wells (MW-05, MW-06, MW-09, MW-10, MW-11, and MW-12) as shown on Figure 1. Wells MW-05 and MW-06 are upgradient wells. All CCR groundwater monitoring data available to date, which includes data from previous groundwater monitoring under the Federal CCR Rule, are provided in Tables 1 and 2. As part of the Application for Initial Operating Permit – Will County Generating Station submitted on October 31, 2021 (Application), *proposed* statistical background concentration calculations along with *proposed* site-specific Groundwater Protection Standards (GWPSSs) were submitted for Illinois Environmental Protection Agency (Agency) review/approval. Table 3 summarizes the *proposed* background statistical concentrations for each parameter along with the site-specific *proposed* GWPSSs in accordance with Section 845.600(a)(2). These are currently still under review by the Agency and therefore, are not finalized. However, for the purposes of evaluations required for the annual report, data comparisons will be presented relative to the “*proposed*” values for statistical background concentrations and site-specific GWPSSs.

This overview of the 2024 groundwater monitoring period is provided in accordance with Section 845.610(e)(4). Each required item is discussed separately below.

- Section 845.610(e)(4)(A and B) – *Proposed* statistical background concentration calculations (see Table 3) were submitted to the Agency as part of the Application for Initial Operating Permit. This Application is currently still under Agency review. However, assuming that the Agency accepts the proposed background calculations, for the 2024 reporting period, the following are constituents with potential statistically significant increases (SSIs) above the *proposed* background concentrations. It is noted that other than those constituents identified in the next main bullet, none of these potential SSI concentrations are above *proposed* site-specific GWPSSs. The constituents and associated wells are:
 - Boron: MW-05 (1st through 4th quarters)
 - Chloride: MW-09 (1st through 4th quarters), MW-12 (2nd through 4th quarters)
 - Fluoride: MW-10 (3rd and 4th quarters)
 - pH: MW-05 (1st quarter)
 - Total Dissolved Solids: MW-05 (1st, 3rd and 4th quarters), MW-12 (1st through 4th quarters)
 - Arsenic: MW-09, MW-10 and MW-11 (1st through 4th quarters)
 - Barium: MW-10 (1st quarter), and MW-11 and MW-12 (1st through 4th quarters)

- Lead: MW-11 (1st and 2nd quarters), MW-12 (1st quarter)
- Lithium: MW-05 (3rd and 4th quarters)
- Mercury: MW-09 (2nd quarter)
- Radium: MW-09 (4th quarter), MW-10 and MW-11 (1st through 4th quarters), MW-12 (2nd and 4th quarters)

Wells MW-05 and MW-06 are the upgradient wells.

- Section 845.610(e)(4)(C and D) – *Proposed* GWPSs in accordance with Section 845.600(a)(2) (see Table 3) were submitted to the Agency as part of the Application for Initial Operating Permit. This Application is currently still under review by the Agency. However, assuming that the Agency accepts the *proposed* GWPSs, for the 2024 reporting period, the following constituents are above the *proposed* GWPSs:

- Boron: MW-05 (1st through 4th quarters)
- Chloride: MW-09 and MW-12 (4th quarter)
- Total Dissolved Solids: MW-05 (1st quarter)
- Arsenic: MW-10 (1st, 2nd and 4th quarters), MW-11 (1st and 2nd quarters)
- Mercury: MW-09 (2nd quarter)

Wells MW-05 and MW-06 are the upgradient wells.

- Section 845.610(e)(4)(E through H) – Ash Ponds 2S and 3S are currently not in corrective action relative to the State CCR Rule. It is noted that these ponds are under corrective action relative to the Federal CCR Rule. Please refer to the Federal CCR Compliance Annual Groundwater Monitoring and Corrective Action Report – 2024 in the facility's operating record for additional information.

2.0 ANNUAL STATUS SUMMARY

As discussed in Section 1.0 the CCR monitoring well network around Ash Ponds 2S and 3S consists of six monitoring wells (MW-05, MW-06, MW-09, MW-10, MW-11, and MW-12). Wells MW-05 and MW-06 are upgradient wells as shown on Figure 1. All CCR groundwater monitoring data available to date, which includes data from previous groundwater monitoring under the Federal CCR Rule, are provided in Tables 1 and 2. The backup analytical packages have been previously provided as part of the 60-day submittal requirements. Table 3 summarizes the *proposed* background statistical concentrations for each parameter along with the site-specific *proposed* GWPSs in accordance with Section 845.600(a)(2). These are included as part of the Initial Operating Permit Application referenced above, are currently still under review by the Agency and therefore, are not finalized. However, for the purposes of evaluations required for this annual report, data comparisons will be presented relative to the “*proposed*” values for statistical background concentrations and site-specific GWPSs.

This section provides the information specified under Section 845.610(e) (2-3).

2.1 Summary of Actions and Submittals (Section 845.610(e)(2))

During the 2024 reporting period, the following key actions have been completed:

- Quarterly sampling of all parameters specified in Section 845.600(a) plus calcium and turbidity was completed and the associated 60-day data summary submittals were placed in the facility's operating record in accordance with Section 845.610(b)(3)(D).
- Water levels were recorded monthly for the specified CCR monitoring wells and pond water levels were concurrently recorded.

Key activities for the upcoming year include:

- Receipt of an approved Application for Initial Operating Permit which will facilitate finalization of the proposed statistical background concentrations and the proposed site-specific GWPSSs. Once these are accepted/finalized by the Agency, formal groundwater data comparisons and evaluations can be made based on quarterly monitoring results relative to these comparison criteria.
- Receipt of an approved Application for Initial Construction Permit which will facilitate proceeding to formal closure of the regulated Units.
- Continued quarterly groundwater monitoring/reporting.

2.2 Groundwater Data Summary (Section 845.610(e)(3)(A-F)

Identification of monitoring wells and associated constituent concentrations above the proposed site-specific GWPSSs was included in Section 1.0 above. A map showing these wells and constituent concentrations for the most recent round of groundwater sampling (4th quarter 2024) is provided on Figure 2.

There were no monitoring wells installed or decommissioned during this reporting period relative to the State CCR Rule. It is noted, however, that two additional well installations were completed for the purposes of a nature and extent of impacts delineation under the Federal CCR Rule. Please refer to the Federal CCR Compliance Annual Groundwater Monitoring and Corrective Action Report – 2024 in the facility's operating record for additional information.

Water levels were recorded from the specified CCR monitoring wells as part of each sampling event and are summarized in Table 4. Potentiometric surface maps for each round of available water levels are provided in Attachment 1. Groundwater flow beneath Ash Ponds 2S and 3S is consistently in a westerly direction. In accordance with Section 845.640(c)(2), groundwater flow direction and seepage velocity estimates for each round of water levels are provided in Table 5.

A summary of the number of groundwater samples collected for analysis for each CCR monitoring well along with sample dates is provided in Table 6.

Proposed statistical background concentration calculations (see Table 3) were submitted to the Agency as part of the Application for Initial Operating Permit. This Application is currently still under Agency review. However, assuming that the Agency accepts the *proposed* background calculations, the groundwater monitoring over the 2024 reporting period has identified the following constituents with potential statistically significant increases (SSIs) above the *proposed* background concentrations:

- Boron: MW-05 (1st through 4th quarters)
- Chloride: MW-09 (1st through 4th quarters), MW-12 (2nd through 4th quarters)
- Fluoride: MW-10 (3rd and 4th quarters)
- pH: MW-05 (1st quarter)
- Total Dissolved Solids: MW-05 (1st, 3rd and 4th quarters), MW-12 (1st through 4th quarters)
- Arsenic: MW-09, MW-10 and MW-11 (1st through 4th quarters)
- Barium: MW-10 (1st quarter), and MW-11 and MW-12 (1st through 4th quarters)
- Lead: MW-11 (1st and 2nd quarters), MW-12 (1st quarter)
- Lithium: MW-05 (3rd and 4th quarters)
- Mercury: MW-09 (2nd quarter)
- Radium: MW-09 (4th quarter), MW-10 and MW-11 (1st through 4th quarters), MW-12 (2nd and 4th quarters)

Wells MW-05 and MW-06 are upgradient wells. As previously stated, other than those constituents identified in the second bullet in Section 1.0, none of these potential SSI concentrations are above *proposed* site-specific GWPSs.
